

Hydrotech Consultant: Designs Energy Efficient MEP Projects to encourage Natural Resources

The engineering and construction (E&C) industry has had a robust year, and E&C firms are positioned as active participants in building the smart, connected future. Rapid changes in the compliances are going to characterize the technological trends impacting engineering and manufacturing. At the same time, the industry is going to see a continuous effort and challenge to meet the sector's skill gap. As an MEP Consultant & Engineer, Hydrotech Consultant, headquartered in Mumbai, offers sustainable, efficient and culturally-appropriate businesses and places, creating innovative, eco-friendly, energy-efficient and practical buildings engineering designs and consultancy that improve business performance. Hydrotech Consultant delivers innovative and unique infrastructure projects with the help of their experts who ensure that every project meets and exceeds the expectations of clients and building users.

Media Mic believes in the policy of 'No one plan fits all', and this has helped in creating customized strategies to create a niche in the industry within this short period of time

Furthermore, Hydrotech Consultant provides services in HVAC (Heat Ventilation & Air conditioning), elec-

trical, plumbing & fire fighting designing for hotels, office buildings, residential buildings & townships, hospitals, villas, research centers, etc in India and abroad. Firstly, the electrical systems offer emergency power & lighting system, power monitoring control system, interior & exterior lighting system and preparing detailed schematic diagrams for electrical power distribution. Secondly, HVAC systems enable air distribution layouts, air handling equipment, and design ventilation & exhaust system. Thirdly, the company offers fire protection system with fire alarm and detection systems and also the security systems. Lastly, Hydrotech provides plumbing services that design complete water supply with HPS system which includes design of storm water, sanitary, drainage system, sewage treatment & pumping system and Rain Water harvesting (RWH).

But unlike other competitors in market, Hydrotech is different because of punctuality, commitment, and a client-oriented approach. "Hydrotech Consultant is well known for perfection, accuracy, and deadline. We know value of money and never misguide any client or believe in personal benefits. Most importantly we always visit the sites personally and recommend quality of material and never compromise", said Praful P. Naik, Founder, Hydrotech Consultant.

In the journey of 22 years of consultancy, Hydrotech Consultant has worked for many more prestigious clients like Reliance Industries, Mumbai Cricket Association, HPCL, RBI, Great Easter Shipping, Wacker, Piramal, Hinduja Health Care, Hyundai Wadhwa Group and many more. The company has made financial progress of more than 400 percent. At present,

Founder

the company offers services to pan India and also planning to expand its services globally. As the company is always on forefront to deliver efficient engineering, however with increase in the competition, with present economic situation, not all the project ends up in given time. There are many projects which bring changes during the construction work or after designing. Also the approach of the client towards cost-cutting plays vital role. But Hydrotech delivers excellence in engineering and architecture which is bound by the commitment to their clients and to be entrusted by the stakeholders.

With such efficiency, Hydrotech Consultant aims to lead MEP with a more challenging project. The company's vision is to design unique projecting across global and government projects which will be energy efficient to encourage using natural resources like solar energy. Hydrotech's inspiration is to get distinguished as regional leaders in engineering and architecture, and their commitment is to deliver growth and sustainable returns.
